A versatile, creative technology professional with a wide range of skills including web development and design, graphic design, and information technology experience. Strong knowledge of front and back-end design and development, utilizing emerging technologies and frameworks to improve user experience on the web. Provides a commitment to quality and detail, with strong team skills. Seeking a dynamic, collaborative environment to further my skills and grow professionally.

Experience

Present

PartyLite

UX/Web Developer

- Tasked with design/overhaul of existing multilingual/multinational training website (<https://my.partylite.com/>).
- Implemented static site build process using Hugo to be compatible with existing server infrastructure.
- Responsive and accessible design, reducing size of codebase by over 50%.
- Improved user experience with shorter load times, reduced user clicks, and cleaner design.
- Front-end development using HTML5, CSS3/Sass(SCSS), and JavaScript/JQuery where applicable.
- Automation development process with Gulp.

2016

2016
